

# Gel Infused Pressure Reducing mattress

The gel infused pressure reduction foam mattress reduces the likelihood of pressure injuries by creating a cooling effect and thereby channeling heat away from the body. The gel foam redistributes pressure across the surface of the mattress, which helps reduce cradling at higher levels of compression. It's 4 layer design provides a firm lower section to prevent bottoming out while its gel and foam cut upper sections provide ultra comfort.

## Features

- Gel infused foam
- Cooler sleep surface
- 4 Layer Foam Construction
- Optimal Pressure redistribution over large surface area
- High-density foam perimeter provides support and safe patient transfer
- Fluid resistant, easy to clean, vapor permeable stretch mattress cover, ensuring maximum user comfort

## Specs

Item #	62000
Size	36" x 80" x 6"
Weight Capacity	450 LBS
